

INSTALLATION KIT

COMPLIANT WITH DTU 45.11

R-VRAC - UNINHABITED ATTICS

Optimize your **attic insulation** with the essential equipment for professional installation.

The Dagobaire installation kit has been specially designed to support thermal blowing insulation work with our **R-VRAC**.

Designed for a **100 m²** surface area, this kit is essential to ensure the effectiveness of our **R-VRAC** insulation and the safety of your installation.

It includes all the finishing and signage accessories required to comply with professional standards (DTU 45.11).

Sourcing, design and manufacturing
in Hauts-de-France

APPLICATION FOR DTU COMPLIANCE

Attach your measuring gauges every 3 to 4 meters before starting the blowing process. Once insulation is complete, staple the technical data sheet to the framework to keep a record of your work and certify the use of Dagobaire wool.

KIT CONTENTS:

- **4 graduated measuring gauges**
precisely check the thickness and consistency of the blown wool
- **1 job site declaration form**
record technical information
- **5 self-adhesive labels - Electrical boxes**
visual markers to identify points of interest
- **1 self-adhesive label - Electricity meter**
visual markers to identify points of interest

BENEFITS

TECHNICAL COMPLIANCE

installation compliant with certification requirements and state aid standards

EASE OF USE

wide measuring gauges for easy level reading

TIME SAVING

everything you need in a single pack

LONG-LASTING SAFETY

prevents covering high-risk elements thanks to the provided markers
