

R-PROTECT

PROTECTIVE SHEETING - RECYCLED TEXTILE

FLOORS AND STAIRS

R-Protect is an innovative floor protection solution, combining eco-design and technical performance. This multilayer sheet is specially designed to secure your job sites while respecting the environment.

Featuring a highly absorbent recycled textile top layer and a waterproof technical backing, it provides an impenetrable barrier against liquids, paints, and solvents, while ensuring maximum user safety thanks to its anti-slip properties.

Sourcing, design and manufacturing
in Hauts-de-France

APPLICATION FOR FLOORS AND STAIRS

R-Protect is the versatile partner for all building and renovation trades:

- **Painting and decorating:** Immediate absorption of splashes and protection against drips.
- **Finishing work:** Protection of parquet floors, tiles, and carpets during plumbing, electrical, or carpentry work.
- **Relocation and handling:** Prevents scratches and impacts on delicate floors.
- **Industrial and workshop use:** Ideal for liquid storage areas or tool cleaning.

BENEFITS

ULTRA-ABSORBENT

its recycled textile top layer instantly captures liquids

TOTAL WATERPROOFING

the bottom polyethylene membrane guarantees that no liquid seeps through the sheet

ANTI-SLIP SAFETY

does not slip on the floor

HIGH RESISTANCE

reinforced tear-resistant structure

ECO-FRIENDLY COMMITMENT

upcycling of textile waste

PACKAGING

Top layer composition	Absorbent recycled textile
Bottom layer composition	Waterproof and anti-slip polyethylene (PE)
Weight	270 g/m ² (High density)
Roll dimensions	1 m x 25 m
Area per roll	25 m ²
Packaging	Delivered in a roll under protective film
